Anton Burduzha

anton.burduzha@gmail.com | linkedin.com/in/anton-burduzha | Lisbon, Portugal

Profile

Senior Frontend Developer with **8+ years of experience** specializing in building scalable web applications that drive business growth. Expert in **modern JavaScript frameworks, performance optimization, and software testing**. Passionate about translating complex business requirements into intuitive interfaces while ensuring collaboration across design, product, and engineering teams.

Experience

Pluspoint   Sep 2021 - Present
Senior Frontend Developer   *Lisbon, Portugal*

- **Dashboard app**: Developed and maintained an interconnected **ecosystem of React/redux based projects**. Created ui library (**MUI core**), including rich text (**TipTap**), charts (**Chart.js**). **Migrated MUI, React** and following packages to newer versions. Integrated code checkers and **Sentry** for project quality. Developed **service worker for web push-notifications** support and **web-sockets** module for real-time features.
- **End-user app**: Designed **Next.js Typescript** localized pages. Built responsive UI with **Tailwind and HeadlessUI**. Created **web-sockets** module for real time data exchange. **Mentored team member**, conducted code reviews. Integrated **Sentry** for error tracking, applied code style best practices via configuring **EsLint, prettier and pre-commit hook**. Worked on **Gitlab CI** instructions.
- **Widget app**: Implemented cross browser third-party widgets (popup, grid and support chat) using **web components, Sass and jQuery**. Improved build speed via migrating to **Vite**.

Innovecs   Oct 2019 - Sep 2021
Senior Frontend Developer   *Kyiv, Ukraine*

- **Careology**: Integrated **CI/CD pipelines** and designed **AWS infrastructure for web app** while developing interfaces with **React and GraphQL**. Configured **S3 bucket, Cloudfront with 3rd party certificates, Amplify, Codebuild**. Integrated **Firebase** for getting real-time data. Wrote comprehensive **unit and end-to-end tests using Cypress and testing-library**, contributed to the product UI library.

Openware   Dec 2018 - Oct 2019
Frontend Developer   *Kyiv, Ukraine*

- **Baseapp**: **Led micro teams (2-4 members)** and applied core logic on custom interfaces. Redesigned state management system using **Redux + redux-saga**. Reworked auth flow and improved styling system to **make app customisable via CSS variables**. Worked on deployment pipeline for web app with **Drone CI and GCP**, standardized code styles across React apps, and contributed to the product UI library with a focus on code quality.

Ambisafe   Feb 2018 - Dec 2018
Frontend Developer   *Kyiv, Ukraine*

- **w3-wallet**: Migrated **Django templates to React-based pages** while collaborated with Python developers. Optimized application performance using **dynamic imports**, migrated global React state to **Mobx**.

Altronica Ltd.   Mar 2017 - Feb 2018
Junior Frontend Developer   *Kharkiv, Ukraine*

- **Beauty shop admin app**: Developed **pixel-perfect** responsive user interfaces using React while maintaining and enhancing the product UI library. Transformed **Gulp tasks to Webpack config**.
- **dns-zones**: Implemented pages made in InVision app via **AngularJs**. Created page with maps using leaflet library which shows geo-based visualization for traceroute command

Education

National Aerospace University "Kharkiv Aviation Institute"   Kharkiv, Ukraine
Master's degree in Computer systems and networks   *Sep. 2011 – Feb. 2017*

Technical Skills

Programming and Frontend: React, TypeScript, JavaScript, HTML & CSS, Next.js, Redux/State Management, Node.js, Python, Flask, htmx
Styling & UI Development: Styled-components, Tailwind, Material-UI, Sass, Web Components, Figma
Tools & Infrastructure: Webpack, Vite, ESLint, Git & CI/CD, Testing Tools (Vitest, Jest, Testing Library), AWS (S3, Cloudfront, Amplify, Supabase), Web Sockets, Service workers, Sentry, Docker, GraphQL & Apollo, Bash
